CHETANSHIL KUMAR PATEL

Mechanical Engineer

WhatsApp | Gmail | LinkedIn | GitHub | Nepal

Professional Summary

Motivated and detail-oriented Mechanical Engineering graduate seeking an entry-level role to apply knowledge of CAD design, mechanical systems, and manufacturing processes. Passionate about learning and contributing to innovative engineering projects in the automotive or manufacturing sectors.

Education

B.Tech, Mechanical Engineering — Guru Nanak Institute of Technology 2021–2025
CGPA: 7.3 / 10

Trinity International Secondary School (+2) 2020–2021
Year of passing: 2021 | Percentage: 74.5%

Work Experience

Kia Motors (Plant) — Production Associate 2025–2026

- Worked across Trim 1, Trim 2, and Chassis lines with a focus on quality and safety.
- Trim 1: Installed seat belts, shock absorbers, air exhaust, airbags, and anti-noise pads; performed tailgate routing and safety-parts installation.
- Trim 2: Assembled handles, fenders, and interior/exterior parts; fastened and routed clips and harnesses according to SOP.
- Chassis: Installed, mounted, and aligned engines; torque-tightened parts; fitted radiators, suspension, and brake lines; performed under-body inspections.
- Followed SOP, quality standards, 5S, and lean practices; used torque and pneumatic tools and coordinated effectively with the team.

Bakery Machineries — Manufacturing Unit In-Charge 2024 · 6 months

- Supervised daily operations and coordinated production activities for a bakery-machinery manufacturing unit.
- Ensured timely manufacturing and maintenance of machinery components; managed team workflow and quality control.

Key Skills

Technical: AutoCAD, CAD Design, Mechanical Systems, Manufacturing Processes, MS Word, MS Excel, MS PowerPoint

Manufacturing: Torque & Pneumatic Tools, SOP Compliance, 5S, Lean Practices, Quality Control

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Continuous Learning

UI/UX Design: Figma, Adobe XD, Adobe Photoshop, Canva

Creative Tools: Adobe Premiere Pro, VN, CapCut

Academic Projects (Research Publications & Certifications)

Major Project — Friction Stir Processing of Aluminium 3103 with Graphene 2025
View

- Enhanced the mechanical properties of Aluminium 3103 using Friction Stir Processing with graphene nanoparticles.
- Improved hardness, strength, and wear resistance through uniform graphene dispersion.

Design and Analysis of Drum Brake 2024
View

- Designed and maintained brake systems for automotive applications; gained hands-on experience with the repair and function of wheels and axle components.

Additional Interests

Athletics, Taekwondo, Arts, Drawing, Singing, Acting, Cricket, Gym
